Dear Mr Minionis

**Re: BBA Assessment of MySpacePod Modular Building System (single module application)**

The British Board Agrément is currently undertaking a technical assessment of the above referenced product for which (subject to satisfactory completion of the assessment) an Agrément Certificate is to be issued.

The assessment takes account of mechanical resistance and stability, design requirements, durability, acoustic, thermal and fire resistance, condensation risk and material specifications. The assessment also takes account of the method of production and the system's compliance with current UK Building Regulations.

Although there are still a number of technical issues to conclude on the assessment work is advanced and we are already in the process of preparing a draft Certificate for comment. Subject to there being no unforeseen circumstances we should be in a position to issue a final draft Agrément Certificate within the next 2 to 3 months.

Yours sincerely

Rob Childs  
Project Manager/Engineer

The UK Representative in EOTA (European Organisation for Technical Approvals) and in the UEAtc (European Union of Agrément).
